Number of Hops: 30 hops  
Latency: 0 ms

The traceroute experienced one or more errors. If the upload and download checks have also failed then please contact support, otherwise this should not have an impact on testing.

NOTE: The traceroute works by sending a packet of data from our server to the WANIP currently identified for this device, one hop at a time. At each hop, a response is returned so that we know the packet has successfully arrived at its destination. A common cause of this check failing is that a router has not been configured to send a response when the packet of data has been received, which could be for a variety of reasons including to increase performance.

HTTP Protocol	HTTP/1.1
Mime Types	application/pdf, text/pdf
Number of Checks	13
Number of Checks Passed	10
Number of Checks Warned	3

# You have completed the Test Delivery Check
